Body Ecology Field Co-ordinator: Zsuzsanna Soboslay

Min 8 registrations to proceed

Mid-Semester Break Tuesday 20 April then

Thursday 22 April - Monday 26 April

Follow-up weekend Dates to be determined by group

This Study is suitable for visual artists or musicians wanting to develop sensory and ethical acuity in their work, and investigate methods of sustaining and informing their practice. The Study undertakes to develop:- awareness of internal physiological processes; ecological relationships to the exterior world; and a methodology to assess one's creative sensibilities. Fieldwork at *Tidbinbilla Nature Reserve* focusing on the intricate relationship of our bodies and psyches to landscape. These experiences can be expressed in visual or aural media, and into writing, working toward either a portfolio or a performance, with the possibility of the latter being at Tidbinbilla.

Proposal Briefing **Monday 1 March 3.15pm**
SoA Conference Room

Registration forms for above proposals available
from Environment Studio

Deadline: 4pm Thursday 4 March
